With the advent of INDUSTRY 4.0 and MADE IN CHINA 2025, traditional industries in China are advancing rapidly towards digital transformation where machines are made to be increasingly intelligent, mobile and interconnected. The importance of this technology for the world’s automotive industry and its suppliers cannot be overstated, with China being the largest growth market, especially in terms of E-Mobility.

China’s booming center of this development is the city of SHENYANG. It is home to the China-Germany Equipment Manufacturing Industrial Park (CGIP), where one of BMW’s largest production facilities worldwide is located, and offers unrivaled opportunities for growth and cooperation.

With more than 3,000 resident companies and an area of 50 km², CGIP SHENYANG is the largest industrial park of Liaoning province and facilitates and coordinates the establishment of an international supply industry via its GERMAN OFFSHORE CENTER IN HEIDELBERG.

To this end, the event in Shenyang will focus on promoting collaboration between the Chinese and German Automotive industries by exploring insights and best practices to enable digital innovation in the Chinese smart manufacturing automotive field.

The summit will also see the INAUGURATION CEREMONY of a high-level SHENYANG INDUSTRY 4.0 INNOVATION PLATFORM which, together with the local SHENYANG OFFSHORE CENTER, will stimulate manufacturing collaboration through concrete measures with renowned international industry leaders to accelerate China’s digital transformation and provide new opportunities in the domain of smart factories.

We cordially invite you to join us in Shenyang and witness the beginning of a new chapter in the bilateral cooperation between Germany’s and China’s automotive industries.

REGISTRATION UNTIL MAY 15TH, 2019
Mr Jean-Christophe Irigoyen, Director CGIP
